The Grip at Dover-

The epidemic seems to grow less and surface of the population is seen of the population and less severe as it ranges from north to south of Italy. In Tuscany and the Campagns it is not very severe, and in Naples it is almost nothing. But on the other hand, it is raging with fearful malignity in Sielly. The epidemic of influenza has beworse. The loading and unloading of the vessels in port has been suspended, and many schools are closed in consequence of the illness of pupils. The influenza prevails extensively in Florence. The epidemic in Pledmont is very virulent, and many deaths have occurred.

Mr. Editor, did the voice of "Rumor" inform you that the honorable leader of the "Opera House orchestra" had been selected as the "assistant conductor" for the new organization, the Logan Chorai society, and that possibly the title of the honorable position was a little more than his honor could accept.
